

NOMAPACK®
Product range

You crack it. We pack it.

Taylor Made

Made-to-measure packaging

NOMAPACK® covers a comprehensive standard range of packaging profiles. But frequently, only a custom-made product will do the job sufficiently well. We'll be delighted to develop **tailor-made packaging** in partnership with your specialists – no matter how unconventional in shape or nature.

Customer-specific products require **leading-edge technology**: thanks to process-controlled systems, we can respond flexibly and at short notice to global market trends and needs. Numerous production techniques such as extrusion, form moulding, hot-melt, profiling and cutting processes etc. facilitate foam production that is entirely solution focused.

Yet it isn't only specific and individual problem solutions that are a strength of NMC; our all-embracing **service** is equally prized. The backbone to this are our 15 networked logistics centres and subsidiaries that carry comprehensive ranges of stock items, thereby guaranteeing rapid delivery across Europe.

Diversity in shape

Various side lengths

Piece, fixed-length and rolled goods

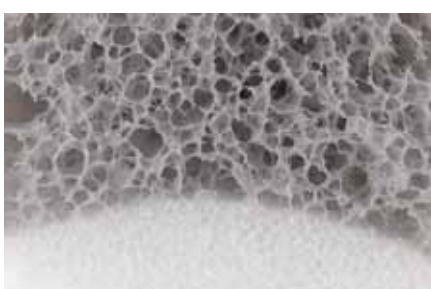

Additives

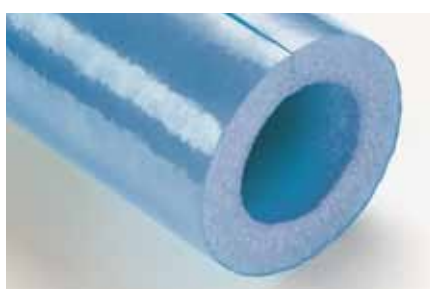

Adhesives

Special serrations

Density

Co-extrusion

Lamination

NOMAPACK®

The full product range

NOMAPACK® U

NOMAPACK® U is an effective guard for corners and all kinds of edges.

- Edge trim from 2 to 160 mm
- Extremely adaptable Multishape version
- Densities from 25 to 60 kg/m³
